Partnership 2026

Preventative school health is one of the highest-leverage investments in education: for \$30 per learner per year, all-in, children get safe water, termly deworming and vitamins, trained first-responder teachers, and vision screening. Join us as we reach ten new schools in Mubende and Mukono.

Classroom Sponsor

A full year of preventive health for one classroom.

\$1,500 /year

50 children at \$30 each

- ✓ Safe water, three termly health days and a vision screening for every child in the class
- ✓ Teacher first-aid training and a stocked first-aid station
- ✓ A termly report on the children you fund

[Sponsor a Classroom](#)

WHAT \$1,500 BUYS

50 children x \$30, all-in, for a full year

Safe drinking water at school	included
Three termly health days	included
Teacher first-aid training	included
Vision screening and referral	included
Field team and termly report	included

Total per year **\$1,500**

Costed against public benchmarks: GiveWell, DCP3 and Ugandan Water Project pricing. Detail at schoolhealthafrica.pages.dev/transparency.

THE BENCHMARKS WE COST AGAINST

\$0.50

per deworming dose, three a year (GiveWell)

\$3,800

water system for a school (installed)

\$0.60

vision screening per child per year (DCP3)

\$30

our full package per learner, per year, all-in

WHY PARTNER WITH US

- ✓ Measured: every figure in our impact report comes from school records verified with head teachers.
- ✓ Efficient: a classroom-based model with no clinics to build; \$30 per learner per year, all-in.
- ✓ Recognized: termly impact updates and a named feature in our impact report.
- ✓ Proven: 1,500 children reached, 40 teachers certified, 1,000 vision screenings across 5 schools.
